1. What is jQuery? Is jQuery a different language than JavaScript?
2. Explain what each of following jQuery code does
   a. `$(function () {....})`
   b. `$(e)` // e is a DOM object
   c. `$("div")`
   d. `$("<div>")`
3. What does 'this' keyword refer to, when it is used inside `.each()` jQuery method?
4. What are the key differences between `.css("property")` and `.css("property", "value")`
5. How can you trigger prior registered event imperatively (from the code itself?)

Need of modifier syntax?
